## HYALURONIC ACID GEL

### **MEDICATION:**

This compound contains Hyaluronic acid gel.

### **USE:**

This medication is a naturally-occurring polysaccharide found in the human body. It acts as a cushioning and lubrication agent for joints and nerves. It can be used as a moisturizer for hair, skin, and eyes. Other uses include vaginal lubrication and vaginal moisture retention.

### **SIDE EFFECTS:**

Side effects of vaginal hyaluronic acid gel include **rash, itching, burning, or unusual discharge**. Side effects of topical hyaluronic acid gel include **rash or redness** at the application site.

### **PRECAUTIONS:**

Do not use while pregnant or breast feeding. Do not use if trying to conceive.

### **DIRECTIONS:**

This medication should be administered as directed by a provider or pharmacist. Patients should always follow their provider's or pharmacist's instructions for administration. Patients should not exceed the dosage prescribed by their provider. Follow dosage directions exactly. **If a patient misses a dose**, she should take the dose as soon as remembered. Patients should not take the dose if it is almost time for the next dose. Instead, patients should skip the missed dose and resume the usual dosing schedule. The medication should be stored as directed by your pharmacist.
